Title

> *std_options* — Options for use with graph construction commands

    Description   Syntax   Options   Remarks and examples   Also see

Description

The above options are allowed with

Command	Manual entry
graph bar and graph hbar	[G-2] **graph bar**
graph dot	[G-2] **graph dot**
graph box	[G-2] **graph box**
graph pie	[G-2] **graph pie**

See [G-3] *twoway_options* for the standard options allowed with graph twoway.

Syntax

std_options	Description
title_options	titles, subtitles, notes, captions
scale(*#*)	resize text and markers
region_options	outlining, shading, graph size
scheme(*schemename*)	overall look
play(*recordingname*)	play edits from *recordingname*
nodraw	suppress display of graph
name(*name*, ...)	specify name for graph
saving(*filename*, ...)	save graph in file

Options

title_options allow you to specify titles, subtitles, notes, and captions to be placed on the graph; see
    [G-3] *title_options*.

scale(*#*) specifies a multiplier that affects the size of all text and markers in a graph. scale(1) is
    the default, and scale(1.2) would make all text and markers 20% larger.
    See [G-3] *scale_option*.

region_options allow outlining the plot region (such as placing or suppressing a border around the
    graph), specifying a background shading for the region, and the controlling of the graph size. See
    [G-3] *region_options*.

scheme(*schemename*) specifies the overall look of the graph; see [G-3] *scheme_option*.

play(*recordingname*) applies the edits from *recordingname* to the graph, where *recordingname* is the name under which edits previously made in the Graph Editor have been recorded and stored. See *Graph Recorder* in [G-1] **Graph Editor**.

nodraw causes the graph to be constructed but not displayed; see [G-3] *nodraw_option*.

name(*name* [, replace]) specifies the name of the graph. name(Graph, replace) is the default. See [G-3] *name_option*.

saving(*filename* [, asis replace]) specifies that the graph be saved as *filename*. If *filename* is specified without an extension, .gph is assumed. asis specifies that the graph be saved just as it is. replace specifies that, if the file already exists, it is okay to replace it. See [G-3] *saving_option*.

Remarks and examples   stata.com

The above options may be used with any of the graph commands listed above.
