

Intro 1 — How to read this manual

[Description](#) [Remarks and examples](#) [Also see](#)

Description

A brief overview of the manual and suggested reading order.

Remarks and examples

stata.com

If you are new to collections, read almost all the intros in order. In particular, read these intros in order:

[TABLES] Intro	Introduction
[TABLES] Intro 1	How to read this manual (this entry)
[TABLES] Intro 2	A tour of concepts and commands
[TABLES] Intro 3	Workflow outline

[\[TABLES\] Intro 3](#) also serves as a reference. The workflow is both a workflow and an overview of the commands within that workflow.

We did not list [\[TABLES\] Intro 4](#) and [\[TABLES\] Intro 5](#) for immediate reading. If you would like to see all the commands organized by their function, then read

[TABLES] Intro 4	Overview of commands
----------------------------------	----------------------

Finally, to see a list of all the tabulation commands that we do not address in this manual, see

[TABLES] Intro 5	Other tabulation commands
----------------------------------	---------------------------

A few of the commands listed here return some of their results, but not their tabulations, in `r()`, and those results can be collected.

After reading the introduction entries on the reading list, you will be ready to start any tables project. You will need the remaining entries as reference.
